Hi there! I'm someone who likes to have fun while getting things done. I'm a hands-on QA engineering leader with 10+ years in testing, 9+ years in automation, and 4+ years in management, focused on building scalable automation, QA infrastructure, CI/CD workflows, and AI-assisted testing with Claude Code and custom skills.

Skills

- | | |
|--|---|
| <ul style="list-style-type: none">• Test automation architecture and QA infrastructure• Cypress, WebdriverIO, Jest, API testing, and Postman• GitHub Actions, CI/CD, BrowserStack• Web, mobile, and cross-platform E2E testing• Azure, Kubernetes, Docker, and test environment management | <ul style="list-style-type: none">• AI-assisted QA engineering using Claude Code• Creating and using custom AI skills for QA workflows• Test strategy, quality standards, and risk-based testing• Team leadership, mentoring, coaching, and process implementation |

Experience

APRIL 2024 - CURRENT

QA Manager / Rebtel, Stockholm

- Built QA processes and automation foundations from scratch, including AI-driven testing initiatives.
- Set up QA infrastructure with WebdriverIO, BrowserStack, TypeScript, Cypress, and Jest API testing.
- Created and maintained automated coverage across web, app, and API flows.
- Used Claude Code and custom skills to support test generation, debugging, automation planning, and QA workflows.
- Scaled test coverage from 300 to over 2,000 test cases.
- Built a company-wide test user management tool.

JUNE 2021 - APRIL 2024

Senior QA Engineer → QA Manager / Plotly, Vancouver

Promoted to QA Manager within 3 months after establishing Plotly's QA automation foundation across tooling, CI, test processes, and quality standards.

- Built and maintained QA processes, automation strategy, and test coverage across Dash Enterprise.
- Created an internal environment seeding tool that reduced setup time by over 40%.
- Built internal Plotly applications using Python to support testing and QA workflows.
- Set up Cypress automation in CI with automated test reports sent directly to Slack.
- Wrote and maintained test cases across supported platforms and configurations.
- Led QA delivery for Dash Enterprise 5.0, 5.1, and 5.2.
- Reduced supported configurations from 21 to 14, saving approximately \$140,000 in costs.

JANUARY 2019 – JUNE 2021

QA Engineer → Senior QA Engineer / Apply Digital, Vancouver

Progressed from QA Engineer to Senior QA Engineer while building automation tooling, improving E2E setup, and expanding mobile and web test coverage.

- Introduced Cypress and created easy-to-follow onboarding tutorials to accelerate adoption across projects.
- Created a one-line setup script for Cypress, reducing new project setup time by over 20%.
- Built a streamlined automated E2E setup for faster and more consistent test implementation.
- Worked with WebdriverIO and JavaScript on automated testing for client projects.

- Added native and web mobile E2E test coverage for iOS and Android.
- Built a C# testing tool for a claw machine project.
- Wrote and maintained test cases across multiple platforms and projects.
- Coached 4 manual testers into QA Engineer roles through hands-on technical guidance.
- Led QA delivery for an award-winning mobile game recognized with Muse and NYX awards in 2020.

Nov 2015 – December 2018

QA Specialist → QA Engineer / Cumul8, Vancouver

Progressed from QA Specialist to QA Engineer while building QA processes, improving release workflows, and strengthening automation and CI infrastructure.

- Created QA testing processes from scratch, including test plans and test strategies for mobile and web.
- Set up and maintained testing, staging, and production environments.
- Introduced Cypress automation and integrated it into CI.
- Rebuilt the front-end CI builder, making it 15% faster and easier to maintain.
- Improved test data quality by advocating for accurate, production-like customer data.
- Scheduled releases and coordinated QA delivery with an offshore team.

MARCH 2015 – NOV 2015

QA Dev Support / United Front Games, Vancouver

- Tested and deployed game patches together with a team of 8 testers.
- Reproduced production issues safely using a dedicated development environment connected to production-like data.
- Created documentation and onboarding tutorials to help new hires ramp up quickly.

JAN 2015 – FEB 2015

Quality Assurance / Cumul8, Vancouver

- Implemented the initial QA foundation, including test plans and test strategies.
- Tested web and mobile applications across key product flows.
- Taught the wider team how to follow the testing process.

Education

JANUARY 2013 – DECEMBER 2013

Entertainment Business Management / VFS, Vancouver

An intensive course where I was taught about how the business side works within the entertainment industry, everything from being a great leader, a producer, event manager, and a project manager.

Worked on several projects to learn hands on experience with being a manager.

Courses / Certifications

- | | |
|--|---|
| <ul style="list-style-type: none"> • React 18 Course 2024 - Oct 2024 • Mobile Automation with WIO - Jul 2024 • Testing Javascript - May 2022 • Udemy - React with Redux - March 2021 | <ul style="list-style-type: none"> • Udemy - React JS and Redux - Aug 2020 • Udemy - Selenium WebDriver - Jan 2019 • Udemy - Web Dev bootcamp - April 2018 • Udemy - Learn How To Code: Golang - Feb 2017 |
